

“UNITE TO END TB”

Every Year

9 Million people are affected with TB

3 Million Don't receive the care they need.

Help to reach them

World Tuberculosis Day- observed on **March 24** of every year, is designed to build public awareness about the global epidemic of Tuberculosis and efforts to eliminate the disease, as around 1.7 million people die of this disease every year.

Why World TB Day is Observed

World TB Day is established as an annual event to be celebrated by the people to make them about the basic and essential knowledge of tuberculosis, causes, prevention and cure of this disease and to prevent eradicate this disease from the world. It is absolutely necessary to create awareness people of all groups and various field about this epidemic disease to take precautions. All people should be aware of their health maintenance and must know about the various ways prevention of tuberculosis.
